CUMULATIVE INDEXES

umulative indexes are available for *Physics bstracts. Electrical & Electronics Abstracts* nd *Computer & Control Abstracts,* for both authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts* where the initial volume covered the period 1966–68. The table below shows the prices and periods for the two types of cumulative index.

OTHER INSPEC SERVICES

DI

Selective Dissemination of Information.)
his is a service individually tailored to the requirenents and interests of the engineer or research vorker. Every two weeks details of information elevant to the interest profile of the individual ubscriber are selected from the data being rocessed for the INSPEC Database.

TOPICS

This is an SDI service based on standard profiles. There are over 80 Subjects covering high-activity areas of research and development. This is an inexpensive service designed to alert engineers and researchers to the availability of literatre within their subject area.

TAPES

Tapes containing all the information included in the INSPEC publications are issued twice monthly. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

PROPERTIES OF Gallium Arsenide

This new edition of 'Properties of Gallium Arsenide' comprises 182 specially commissioned articles contributed by 70 experts from the USA, Europe and Japan. Like the 1st edition, it is packed with numeric data, insight and concise discussion all systematically organised and fully subject-indexed.

Contents include all the subjects covered by the original edition revised and updated as necessary, PLUS NEW Datareviews in respect of the following to reflect the way Gallium Arsenide is revolutionising the semiconductor industry:

- ★ **Sheet resistivity of GaAs with atomic plane doping**
- ★ **Electron mobility in heterostructures**
- ★ **Energy levels and photoluminescence spectra due to transition metals**
- ★ **Electron microscopy of defects**
- ★ **Passivation of defects by hydrogenation**
- ★ **Energy levels and fundamental properties of the EL2 defect**
- ★ **Diffusion in GaAs/AlAs superlattices**
- ★ **Thermal, wet, plasma, laser-assisted and new methods of oxidation**
- ★ **Optical functions of AlGaAs**
- ★ **Plasma and ion beam etching of AlGaAs**
- ★ **Ion implantation ranges and rapid thermal annealing**
- ★ **Bulk and epitaxial growth (LEC; HB & VB; chloride VPE; CSVT; MOVCD; & MBE)**
- ★ **GaAs-on-Si and epitaxial liftoff**
- ★ **Exploitation in Devices:**
  Light sources; Millimetre- & micro-wave devices; Integrated optoelectronics; Quantum effect devices; and Solar cells
